Recording check and cash payments

How to record dues paid in person, and how card payments work.

When a member pays their dues **by check or cash**, record it on the website. The website then marks them as an active member and moves their paid-through date forward, the same as if they'd paid online.

Who can do this

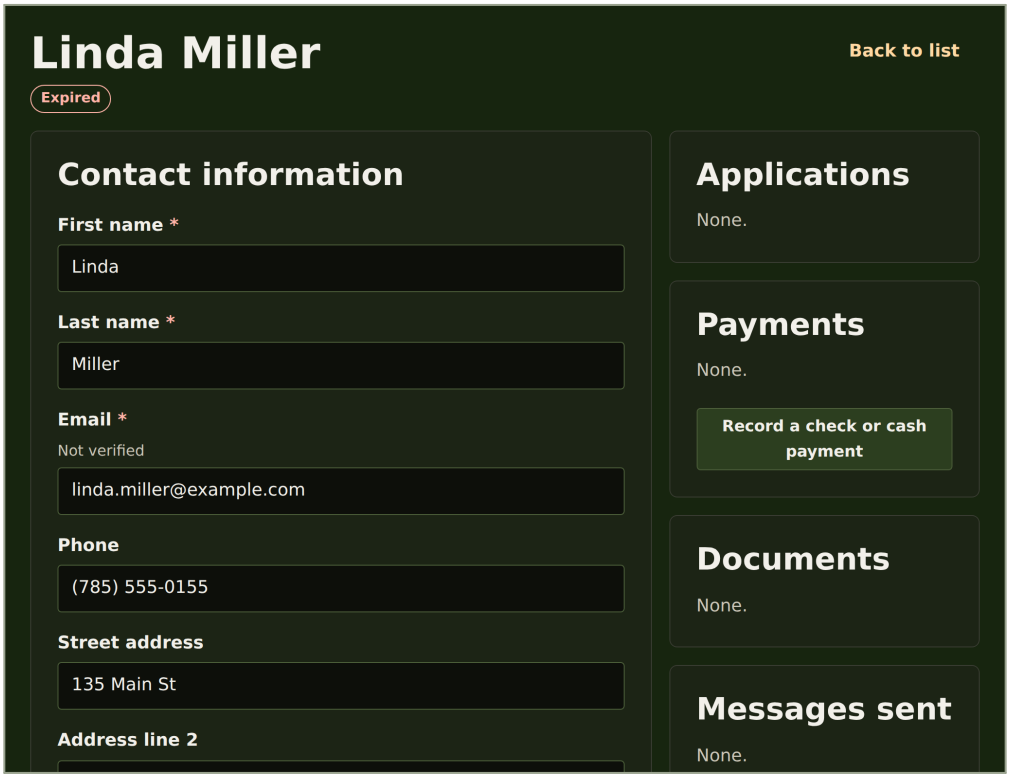

The **treasurer**, **vice president**, **president** and **technology administrator**. Other board members won't see the button. Ask one of them to record it.

What about card payments?

- **When a member pays online with a card**, you don't need to do anything. The website records it automatically and it shows as **Online**.
- **If the club takes a card some other way** (for example a card reader at the range), record it like a check: choose **Other** under **Paid by** and write "Card" in the note.

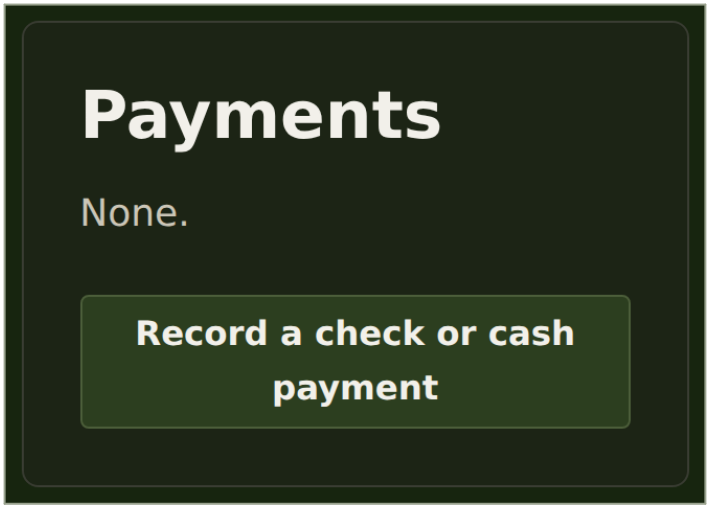

Recording a check or cash payment

1 Find the member (see the guide *Finding a member*) and click their **name** to open their page.

Linda Miller's dues have expired.

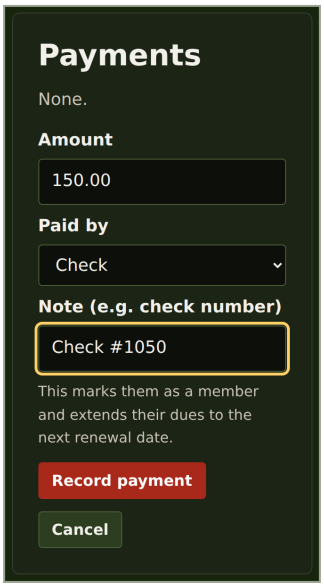

2 On the right, in the **Payments** box, click **Record a check or cash payment**.

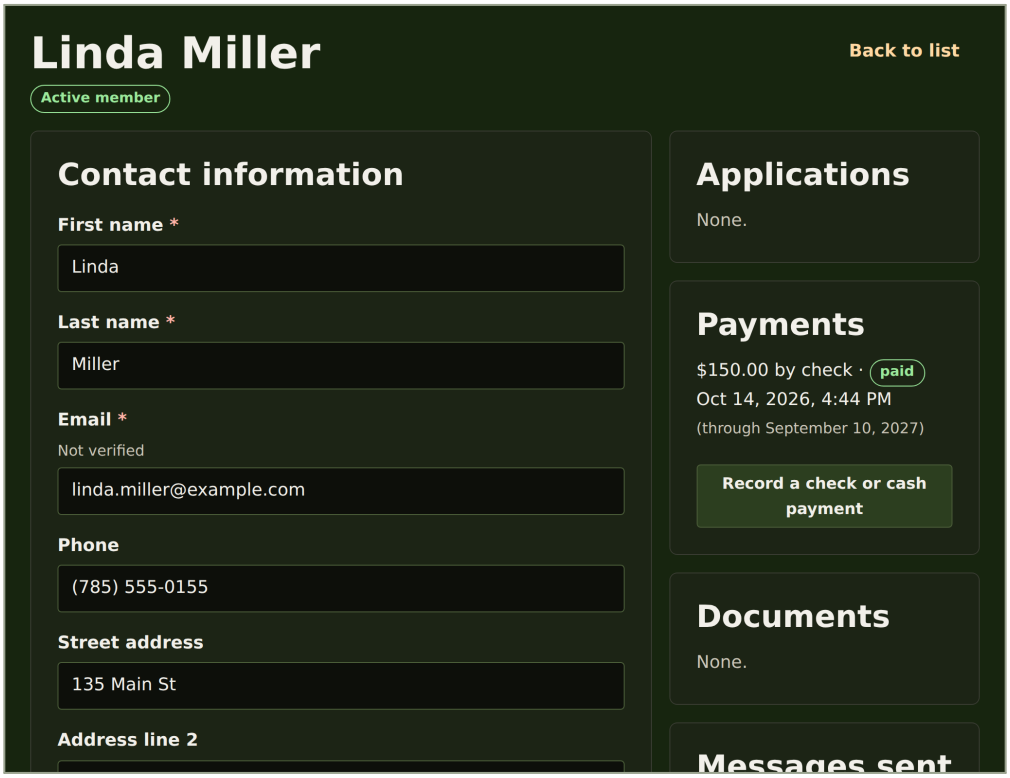

3

Fill in the short form:

- **Amount**: what they paid. It starts at $150.00; change it if they paid a different amount.
- **Paid by**: Check, Cash or Other.
- **Note**: optional but helpful, for example the check number.

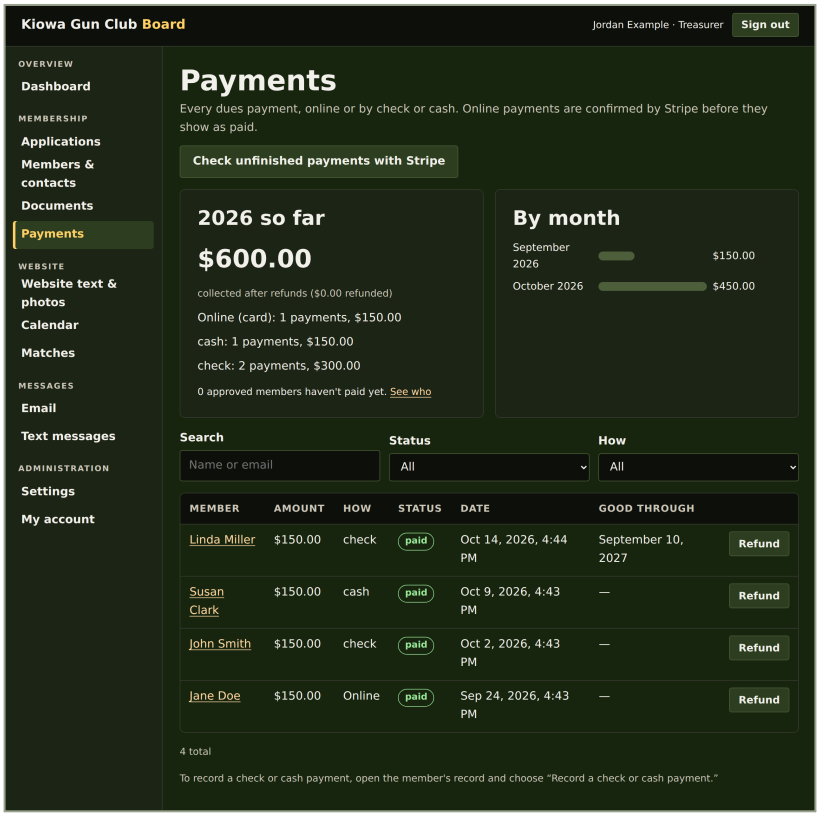

4 Click **Record payment**. The payment appears in the Payments box, their status changes to **Active member**, and their dues are now paid through the next renewal date.

Linda Miller is now an Active member, paid through September 10, 2027.

Seeing all payments

5 Click **Payments** in the menu on the left. You'll see every payment, the total for the year so far, and a breakdown by online, check and cash. Use **Search**, **Status** and **How** to narrow the list.

Made a mistake?

- If you recorded a payment by mistake (wrong person or wrong amount), click **Refund** next to it on the **Payments** page, then enter the amount and a short reason.
- For checks and cash this only marks it as refunded on the website. Give back or void the money yourself.
- Then open the member's page and check that their status and paid-through date are right. Fix them and click **Save changes** if needed.
- To record the correct payment, follow the steps above again.

Good to know

- Record each payment once. Before recording, look at the member's **Payments** box to make sure it isn't already there.
- Every payment you record is saved with your name in the activity log.
